user manual

First Step:-

- Install the Android studio and launch the app.
- Since we are not launching this app, we might need to Download the application package (APK) file from the provided source.

Second Step: -

- Choose an Android device

Third Step:-

- Run the application
 - I recommend cleaning the solution and rebuilding the app before running it.

First screen

- a display message with a nice picture on it will pop up with the app name and the activity name on the home page.
- We have two buttons,
 - EXPLORE OUR NEW DEAL and
 - GET STARTED
 - Both buttons will redirect the user to the second screen so
 - Choose one of the buttons to go to the next screen

Second screen

- The second screen is the explore page, which has more information for users.
- **A calendar:-**
 - users must select a travel date to go to the next Step, so users need to choose a date that is in the future
 - If not, an Error message will pop up.

- The calendar accepts a date up to a year from the current date.
- **A spinner/ DropDown List:-**
 - the second main thing on the second screen is that the user must choose the number of people traveling.
 - Minimum 1
 - Maximum, a group of 5 people
- **A radio button:-** users have three choices that they can choose depending on the country they wish to visit or depending on the price, the image, and the price which is displayed on the screen
 - Users are allowed only to choose one of the three radio buttons.
 - Manchester England
 - New York City
 - And Japan Tokyo
- The user must choose 3 of the main attributes: a valid calendar, one radio button, and one of the list items from the spinner.
 - Then, they can click the **next** button to go to the next screen.
 - If they wish not, they can return using the PREV button.

Third screen

- On this screen, the information they provided will be displayed.
- **Edit Text View**
 - Enter a date (YYYY-MM-DD). The user must provide a valid date.
 - If not, an error message will remind the user to enter a valid date, given a hint in the edit text view.
 - Once a user enters a valid date
- **Switch Bar**
 - There is a switch bar (Review Fare)
 - An option user can check their fare before continuing to the next Step.
 - If users switch the switch bar, then they can see the total price of their trip

- If not, a message will pop up to give them an option to cancel the trip plan
- Users cannot confirm without reviewing the fare
- Users can choose the cancel button to go back to the previous screen

Confirm button

- Once the user provides valid information and agrees with the payment, they can reach the last screen.

Forth screen

- This screen has a message that wishes users to enjoy their trip and a brief view of their hotel.
- There will be A rating bar that will prompt a user to give a rate to the app and their experience of using the trip app
 - According to the rate, different messages will be displayed to users.

Kindly regards
